

Summary of Financial Results for FY2021

# **Summary of FY2021 Financial Results**

(Million yen)

	FY2021 results	FY2020 results	YoY change	Change (%)	FY2021 forecast
Net sales Percentage of overseas sales	432,778 21.8%	336,306 17.5%	+96,471 +4.3P	+28.7% —	400,000 —
Operating profit  Percentage of  operating profit  to net sales	11,670 2.7%	12,324 3.7%	(654) (1.0P)	(5.3%) —	11,500 2.9%
Ordinary profit	12,648	13,836	(1,187)	(8.6%)	12,000
Profit attributable to owners of parent	8,595	9,244	(649)	(7.0%)	7,700

# **FY2021** Results by Business Segment

(Million yen)

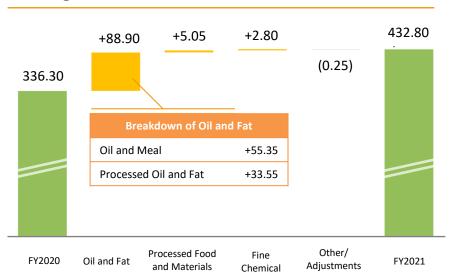

- Net sales increased due to sales price revisions, primarily in the Oil and Fat segment, in response to rising raw materials costs.
- Operating profit decreased despite revised sales prices implemented due to time lags between higher costs and the revised prices during the fiscal year under review. For this reason, said sales price revisions failed to cover higher costs for the span of the term.

# **Factors Impacting Net Sales and Operating Profit in FY2021 (Year on Year)**

(Billion yen)

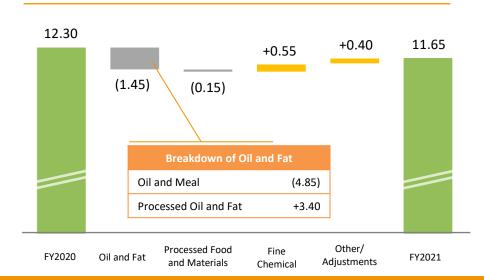

# **Changes in net sales**

## **Factors impacting net sales**

- Oil and Fat
- Revisions to sales prices due to an increase in raw material costs (↑)
- Increase in sales volume of commercial-use products associated with rebound in demand for eating out (↑)
- Decrease in sales volume for general-purpose household-use products compared with the previous year, when demand for home cooking surged  $(\downarrow)$
- Increase both in sales volume and sales prices of meal (↑)
- Processed Food and Materials
- •Increase in sales volume of chocolate products (个)
- Increase in sales volume of MCT products (↑)
- Revisions to sales prices and an increase in sales volume of soybean material/food product (个)
- Fine Chemical
- •Increase in domestic and overseas sales volume due to recovery in demand for raw materials for cosmetics (个)

# Changes in operating profit

## Factors impacting operating profit

- Oil and Fat
- •Increase in raw material costs for oil and meal, processed oil and fat  $(\downarrow)$
- Revisions to sales prices due to an increase in raw material costs (↑)
- •Increase in earnings on market valuation of palm oil transactions (个)
- Processed Food and Materials
- •Increase in sales volume of chocolate products and high profit margin products (↑)
- •Increase in raw material costs for seasonings such as salad dressings  $(\downarrow)$
- •Increase in raw material costs for functional materials and food such as MCT products ( $\downarrow$ )
- Fine Chemical
- •Increase in domestic and overseas sales volume due to recovery in demand for raw materials for cosmetics  $(\uparrow)$
- •Increase in depreciation costs incurred with the start of operations at the new plant  $(\downarrow)$

# FY2022 Forecast

# **Earnings Forecast for FY2022**

# [Major initiatives]

## Response to rising raw material costs

- Secure stable procurement of raw materials and supply of products amid ongoing supply chain disruptions.
- Implement cost-cutting measures on all aspects of business, including purchasing, production, logistics, and sales.
- Continue formulating appropriate sales prices.
- Create new market structures with regard to cooking oil.

## Implementing a value-added strategy

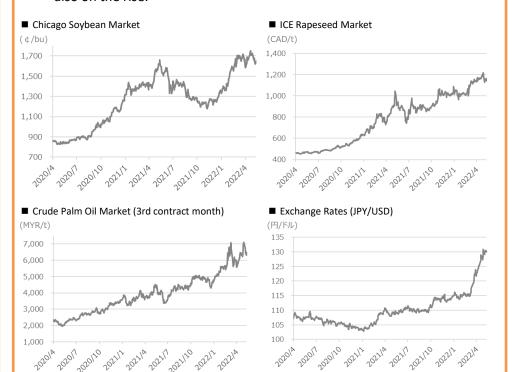

- Expanding on value-added products designed for tastiness and health benefits
- Expanding on products that offer specific solutions such as "customer-solution-type" frying oil
- Proposing applications by leveraging the customer support function and promoting value creation through co-creation with customers

## Initiatives to boost sales and achieve greater growth

- Consistent initiatives to capture demand recovery, facilitated by normalization of the economy and the receding impact of COVID-19
- Growth sectors' steady contribution to earnings (increased sales at ISF Italy and IADC), and consistent investment with a view to further growth
- Developing "solution businesses" through stronger collaboration between global locations; identifying new business partners

## **Cost environment**

- Ongoing supply and demand problems are projected to impact key raw materials markets; factors behind these conditions include increased global demand for grains and oils and fats, declines in production and quality due to unfavorable climate conditions in production areas, and concerns over lower production in Ukraine.
- The yen is rapidly depreciating, resulting in higher oil manufacturing costs.
- Induced by pressure on global demand and supply for oil, costs broadly associated with oil and fat materials (other than soybean and canola) are also on the rise.

	FY2022 forecast	FY2021 results	YoY change	Change (%)

# **FY2022** Net Sales and Operating Profit Forecast by Business Segment

(Million yen)

- Net sales are projected to rise due to factors such as sales price revisions implemented in response to rising raw materials costs and increase in domestic sales volume for oil and fat products.
- Operating profit are projected to increase, despite declines in earnings caused by rising raw materials costs, in light of a variety of factors including appropriate sales pricing formulation commensurate with costs, cost-cutting initiatives, and steady implementation of growth strategies such as expanded sales of value-added products.

## **FY2022 Business Goals**

- The FY2022 business environment is projected to remain challenging; our top priorities are therefore cost-appropriate price formulation and stable raw materials procurement.
- In addition, with a view to improving cash flow issues caused by increased operating capital, as well as to enhancing capital efficiency, steps are taken across the company to effectively control costs. At the same time, management focuses more on capital efficiency.

ROIC	_		4.6%	New goal	

**Reasons for change** 

- To reflect an increase in net sales, with the realization of sales price revisions in line with significant increases in raw material prices and the Company's value creation endeavors
- With respect to capital efficiency, a priority in *Value Up+*, we have established ROIC goals that take into account achievement of an 8% ROE and the business environment.

# **Value Up+** Framework for Managing KPIs Aimed at Realizing Business Goals

To achieve *Value Up+* business goals, we are promoting efforts from the perspectives of growth, active investment, sustainability, and efficiency

**Supply Chain Environment Human Resources** Sustainability **Build a procurement and logistics** Improve engagement Reduction of GHG emissions network to refine "OilliO quality" • Female manager ratio: 8% and competitiveness Improve employee health and performance in line with health and - 8% (Scope 1 and 2) • 100% certified palm oil Active Investment productivity management strategic map. **Value Up+** business goals **Efficiency Growth Investment** ¥540 billion Net sales **ROIC 4.6%** Efficiency **Strategic investment** ¥17 billion **Operating profit** • Expand value-added products in ¥80 billion ROE 8.0% domestic oils and fats sales mix. • Execute strategic investments in Sell cross-shareholdings and review Operating cash flow ¥50 billion marketing, R&D, DX, the KPI asset mix from an efficiency environment, growth, etc. 4.6% ROIC perspective. **BtoC BtoB BtoBtoC** Net sales + ¥5 billion Net sales + ¥55 billion • Form ¥50 billion market for "pour-and-Net sales + ¥10 billion Growth\* • 30% increase in the number of customer enjoy" fresh edible oil. support solutions for the Group • Aim for a volume composition ratio of 40% • 30% increase in volume of sales of oils and • 50% growth rate in health science for strategic cooking oil products. KPI fats for use in chocolate products Disseminate nutritional information on • 30% growth rate in beauty-enhancing lipids in and outside Japan: Reach 30 products million people in Japan (4-year cumulative).

<sup>\*</sup>The net sales targets in terms of growth represent the amount achieved through value creation not affected by sales prices revisions due to the surge in prices of raw materials.

# **Business Environment and Our Response**

### The business environment

- The global economy faces heightened downside risks from rising consumer prices and a shift to tighter monetary policies in countries around the world. This is in addition to global resource supply concerns, price hikes, and disruptions in supply chains due to international tensions caused by emerging geopolitical risks.
- With regard to market prices for raw materials such as soybeans, rapeseed and palm oil, etc., which have a significant impact on the Group, there are concerns that prices will soar and remain high over the medium to long term. This is due to a recovery in demand from the global COVID-19 pandemic and expanding biofuel consumption, as well as uncertainties over grain supplies and supply chain disruptions caused by the deteriorating situation with Russia's invasion of Ukraine; issues which are not expected to be resolved anytime soon.
- While we assume the impact of the spread of COVID-19 will gradually subside, the emergence of a more virulent, infectious variant or a subsequent lockdown and reissuance of an emergency declaration could have an effect on our business performance and financial position.

### Our response

- The most urgent issues are efforts to ensure stable raw material procurement in the face of continuing supply chain disruptions and to offer a steady supply of products. In addition to cost-cutting measures implemented across all aspects of purchasing, production, logistics, and sales, we will continue working to form appropriate sales prices commensurate with the ongoing rise in raw material costs.
- Although the outlook is uncertain and the business environment is expected to remain challenging, the goals of Vision 2030 and its policy toward growth remain unchanged. We will work to achieve our business goals by steadily executing strategies in each area under the Value Up+ Medium-term Management Plan, which serves as a milestone toward the goals set out in Vision 2030.

Note: A review of some indicators has been undertaken, primarily due to the continued high and rising prices of raw materials.

# **Net Sales by Sales Channel**

Progress in sales growth under the *Value Up+* Medium-term Management Plan

FY2024 targets are based on the amount of sales growth from FY2019.

Net sales progress rates are adjusted for the effect of unit sales price fluctuations, changes to accounting standards and other factors.

## FY2024 targets

#### **BtoC**

## +¥5 billion

 Expand domestic household-use market by improving value of oils and fats

### FY2021 results

## **Progress rate: 30%**

 Partly due to increased demand for eating at home during the COVID-19 pandemic, the domestic market for value-added products grew, establishing a market which remained strong.

## FY2022 plan

### **Progress rate: 70%**

 Further expand sales of value-added products; promote structural reforms in cooking oil

### BtoB

## +¥55 billion

 Expand sales by implementing solutions and M&As in domestic and global markets

# **Progress rate: 25%**

- Increased domestic oil and fat sales volume
- Increased overseas processed oil and fat sales volume

## **Progress rate: 45%**

- Recovery of demand post-covid in Japan and expansion of sales opportunities for "customersolution-type" frying oils and other products
- Recovery in sales of oils and fats for use in chocolate
- Expand sales of chocolate products in Japan and Indonesia

#### **BtoBtoC**

## +¥10 billion

 Create new value through market inception and co-creation

## **Progress rate: 10%**

 MCT-related products (e.g., beauty, fat burning) progressed at about 15% of planned values

### **Progress rate: 25%**

- MCT-related products expected to progress at about 40% of planned values
- Expand marketing scope for functional materials

**BtoC** 

## **Domestic Household Use**

### **Efforts toward FY2024**

## Expand the domestic market for household use through mechanisms for enhancing the value of oils and fats

- Form a ¥50 billion market for "pour-and-enjoy" fresh oil (up by 30% versus FY2019)
- Structural reforms in cooking oil (increase composition ratio of functional products, healthy oils and other strategic products to 40%)
- Number of people provided with lipid health information: 30 million (cumulative over 4 years)

added products and strategic products in cooking oil (Sales of value-added oil was up by 1% year on year.)

#### FY2021 results

- "Pour-and-enjoy" fresh oil market: ¥40.2 billion
- Strategic products composition ratio: 43%
- Number of people provided with lipid health information: 8.08 million

## FY2022 plan and efforts

- Continued sales expansion of valueadded oils
- Strategic products composition ratio: 40%
- Number of people provided with lipid health information: 15 million (cumulative from FY2021)

### **Market environment**

- Market size in FY2021 expected to maintain FY2020 level, the highest ever, due to rising demand for eating at home and price revision efforts
- The market for household use has remained strong, with both value and weight exceeding those in FY2019

FY2021 status

Revised selling prices in response to soaring raw material prices, and expanded sales of value-

# Size of market for edible oils for household use (Billion yen)

### \*Compiled based on SCI from Intage Inc.

### FY2022 key measures

- Formation of appropriate sales prices in response to the sharp rise in raw material prices for general-purpose and value-added oils
- Expand sales of value-added products by establishing market for "pour-and-enjoy" fresh oil and developing market for flavored oil, implement cooking oil market structure reforms by strengthening sales of Healthy Off, Natumade and rice oil

## Change in net sales of value-added oils\* for household use

- \*Of the value-added category, olive oil, sesame oil, supplemental oils
- \*Indexed using FY2019 as 100

BtoB

# Domestic Market: Oils and Fats for Commercial Use, Processed Oils & Fats

### **Efforts toward FY2024**

# Growth rate of the Group's customer support solutions (up by 30% versus FY2019)

### FY2021 results

Down by 17% versus FY2019

### FY2022 plan and efforts

 At the same level as FY2019

### **Market environment**

 While the eating-out industry, primarily food and beverage and restaurant outlets, face increased difficulties, ready-to-eat and processed foods are performing well.

### FY2021 status

Sales volumes increased due to efforts to revise sales prices in response to soaring raw material
prices, as well as "needs-collaboration discovery" marketing, strengthened solution proposals, new
partner development etc.

### FY2022 key measures

Form appropriate sales prices in response to soaring raw material prices.

### Oils and fats for commercial use

 Improve problem-solving quality by responding to changes in consumer behavior, labor shortages, rising costs and diversifying health needs for food products, and by promoting "needs-collaboration discovery" marketing.

### **Processed Oils & Fats**

 Propose solutions to add value to customer products, propose applications by leveraging the customer support function, and actively promote value creation through co-creation with customers.

#### Commercial Use

Change in net sales of "customer-solution-type" frying oil and value-added oil

\*Indexed using FY2019 as 100

**BtoB** 

# Oils and Fats for Use in Chocolate

### Efforts toward FY2024

Expand sales volume of oils and fats for use in chocolate (up by 30% versus FY2019)

### FY2021 results

Sales volume down by 12% versus FY2019

### FY2022 plan and efforts

 Sales volume on a par with FY2019 level

### **Market environment**

- There are concerns about the impact of a prolonged deterioration of the situation with Russia's
  invasion of Ukraine on the procurement of raw materials for oils and fats for use in chocolate,
  soaring oilseed material prices, and slowing growth in the chocolate market.
- Momentum is increasing for enhancing sustainability and addressing food safety.

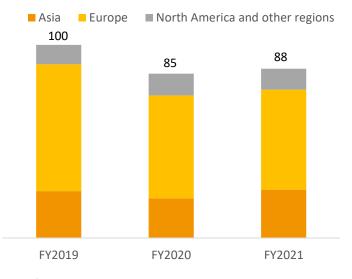

### FY2021 status

- Strengthened customer support based on technical proposals, implemented initiatives for collaboration between subsidiaries, and expanded customer support function to expand sales in the Chinese market
- Decision made and efforts underway to undertake capital investments aimed at boosting production capacity in oils and fats for use in chocolate

### FY2022 key measures

- Disperse raw material origin, ensuring stability in procurement and production through use of alternative raw materials.
- Steadily execute investments in boosting production capacity, essential for expanding sales of oils and fats for use in chocolate in FY2024, with target completion by the end of FY2023.
- Refine technical advantages, such as trace ingredient control, for further sales expansion.
- Develop new partnerships, at ISF Italy, ISF Shanghai and IADC, and strengthen inter-Group collaboration.
- Strengthen and expand bases in anticipation of expansion of North America and Southeast Asia markets.

### Oils and Fats for Use in Chocolate Sales Volume by Area

\*Indexed using FY2019 as 100

**BtoB** 

# **Oils for Cosmetics**

### **Efforts toward FY2024**

Growth rate of beauty-enhancing products:
 Up by 30% (versus FY2019)

\*Target value revised from up 20% to up 30%

### FY2021 results

Oils for cosmetics

Up by 10% versus FY2019

### FY2022 plan and efforts

Oils for cosmetics

Up by 20% versus FY2019

#### Market environment

- While it is taking time for demand in Japan to recover to pre-COVID-19 levels, demand in China has
  recovered significantly beyond pre-COVID-19 levels, while the U.S. is seeing new demand for
  cleansing products, etc. and growth in demand for skincare products
- Meanwhile, soaring prices for oil and fat raw materials and the impact of the COVID-19 pandemic
  on the supply chain have brought a significant rise in costs of raw materials, contract production,
  and logistics.

### FY2021 status

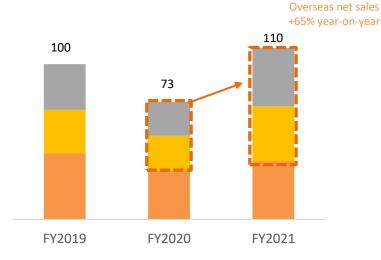

- Strengthened technical support system at the subsidiary in China, actively expanded use of proposal-based marketing
- Developed products that offer differentiation from other oils in the cleansing and skincare areas, and promoted and proposed other mainstay products.
- Steadily captured customer demand in Europe and the U.S. during the COVID-19 pandemic.
- Implemented sales at appropriate prices, primarily for production consignment products where costs have increased significantly.

### FY2022 key measures

- Market at appropriate prices in response to cost increases.
- Strengthen subsidiaries, even as the COVID-19 pandemic continues, in anticipation of market expansion in China and Southeast Asia.
- Identify potential functions of cosmetic specialty oils by leveraging technical support, and develop a global solution business in cooperation with overseas subsidiaries.
- Cooperate with development divisions in and outside the Company and with production consignment companies to develop and introduce "natural-origin-content" products that can enhance the value of ester oils.

### Net Sales of Oils for Cosmetics

\*Indexed using FY2019 as 100

# **Functional Materials and Foods: MCT (Medium-Chain Triglyceride)**

### **Efforts toward FY2024**

 Growth rate of health science products: Up by 50% (versus FY2019)

\*Target value revised from up 30% to up 50%

### FY2021 results

Up by 12% versus FY2019

### FY2022 plan and efforts

Up by 30% versus FY2019

### Market environment

- Maintained level from previous fiscal year, when the market for MCT in edible oils for household use grew significantly.
- MCT recognition is around 35% (Company research), and recognition is advancing in the target group of both men and women with a strong interest in beauty and slimming.
- Raw material costs are increasing significantly due to soaring oil and fat raw material prices and a tight supply-demand balance for oleochemical products.

### FY2021 status

- Developed promotion of MCT as a "functional material" in conjunction with the media, processed food manufacturers, and distributors (products launched by 9 companies).
- Obtained approval as foods with function claims (9 MCT oil products, 2 MCT dressing products), and promoted understanding of MCT functions in conjunction with execution of communication strategy.

## FY2022 key measures

Strengthen cross-collaboration between BtoB and BtoC activities, cultivate MCT brand value, and drive business expansion:

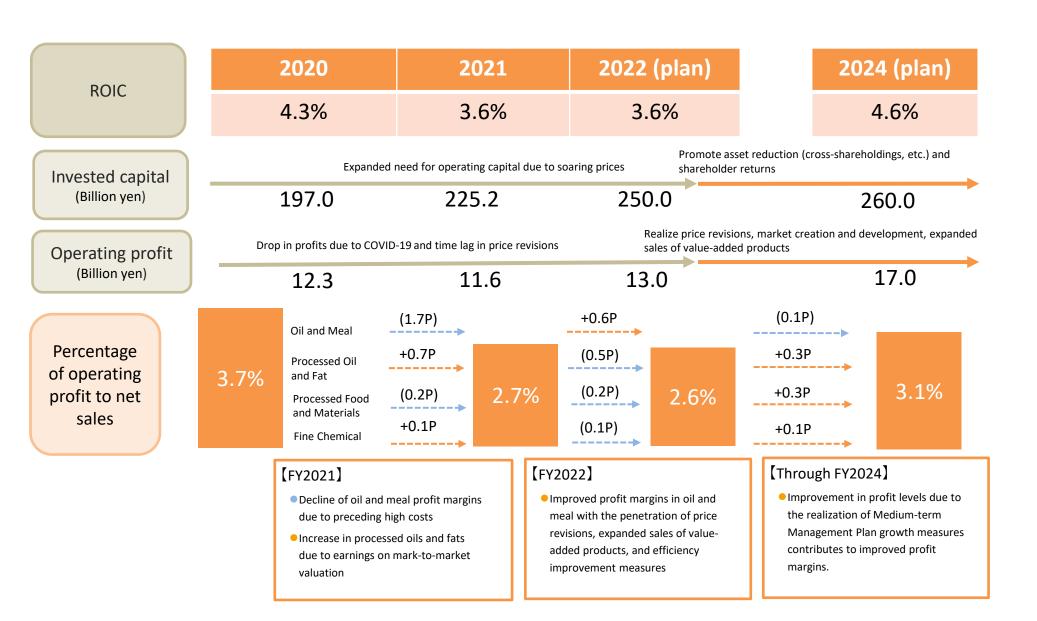

- Continuously approach to processed food manufacturers; commercialize and follow-up with distributors to significantly increase use of MCT (use expected to increase more than five-fold over FY2021).
- Take advantage of having obtained approval as foods with function claims, promote not only awareness but understanding of "what MCT can do," and stimulate a willingness to buy (aggressive product launches, coordination between communication activities and sales).

MCT's functions and applications are introduced in various types of media.

## Efficiency

# **Enhancing Capital Efficiency with Sustainable Growth**

# **Sustainability** Global Environment/Supply Chain Connected by Trust

### **Efforts toward FY2024**

**Environment** • Reduction

Reduction of GHG emissions
 Scope 1, 2 -8% (versus FY2016)

Supply chain

 Improved sustainability in procurement
 Percentage of certified palm oil sourced 100%

### FY2021 results

**Environment** 

Scope 1, 2
Approx. -7.3%
\*Preliminary figures

**Supply chain** 

 Percentage of certified palm oil sourced 54.9%

### FY2022 plan and efforts

**Environment** 

Scope 1, 2 -8%

**Supply chain** 

Advance efforts toward 100% sourcing of certified palm oil

## **Key initiatives in FY2021**

## **Environment**

- Decarbonization Advancement Office was established to promote efforts to reduce GHG emissions, and a road map for achieving targets was formulated.
- Specific review of action plans began regarding the Sustainability Center concept for the Sakai Plant.
- New energy-saving equipment was installed at domestic production bases, and GHG reduction effects were confirmed.

## **Supply chain**

- Acceptance testing was conducted at production bases toward reaching 100% sourcing of certified palm oil.
- Expanded domestic bases handling certified oil product to expand sales.

### Initiatives in FY2022 and beyond

## **Environment**

- New facilities that utilize renewable energy and by-products are scheduled to be introduced at domestic production bases in FY2022.
- Promote phased switchover to energy-efficient equipment including deployment of equipment whose GHG reduction effects were confirmed in FY2021, at more of our manufacturing facilities.

## **Supply chain**

- Offer support for the establishment of the MSPO system, Malaysia's certification standard, including test purchases of certified oil.
- Collaborate with NGOs and related businesses to promote activities aimed at supply chain improvements.
- Plan to disclose the status of efforts to improve traceability back to farms.

### Sales expansion

### Co-creation mechanisms: Approx. ¥10 billion

- **Expand incubation function**
- Marketing of functional materials

### Production capacity expansion: Approx. ¥10 billion

- Boost production capacity for oils and fats for use in chocolate
- Expand sales of value-added products in domestic market

### Strengthening of infrastructure

## DX investments: Approx. ¥5 billion

Smart Factory conversion at Nagoya Plant

### Environmental investments: Approx. ¥5 billion

Investments in decarbonization, etc., primarily at Sakai Plant

### FY2021 Results

- Strengthened/implemented incubation function at Yokohama Isogo Complex (scheduled completion in FY2024)
- Boosted production capacity at ISF for oils and fats for use in chocolate (scheduled to commence operation in FY2024)
- Boosted filling capacity of oils for commercial use at Nagoya Plant (commenced operation in January 2022)
- Introduced a manufacturing execution management system to serve as a smart factory base, to commence operation in FY2024 (deployment to be completed by the end of FY2023)
- Introduced environmentally friendly production equipment (scheduled to commence operation in 2023)
- Installed solar panels at domestic production bases

# Status of efforts to establish an oil extraction joint venture in the West Japan area with J-Oil Mills, Inc.

- Between July 2021 and March 2022, a feasibility study was conducted in advance of establishing an oil extraction joint venture in the West Japan area.
- Efforts continue toward realizing a smooth joint venture, as operational and administrative issues are identified and addressed based on the results of that study.

# Analysis and disclosure of information regarding risks and opportunities for the Group due to climate change, based on TCFD recommendations

• In March 2021, we announced our support for the TCFD recommendations, conducted an analysis of the risks and opportunities for the Group associated with climate change, and published the results on the Company's website along with measures to address them.
