

Nisshin OilliO Group Grievance Log (Updated April 2024)

This is the list of grievances that are registered by the Nisshin OilliO Group in accordance with Nisshin OilliO Group Grievance Procedure.

Ref No	Date	Year	Supplier	Relationship	Subject Matter	Raised by	Progress	Status
1	April	2020	Tabung Haji via ISF and trading companies	Indirect	Between January 2016 and December 2018, TH Plantations cleared some 2,223 ha of forest in these developments, followed by another 22 ha in early 2019. In the area designated for clearing for the third phase of the project, 7,350 ha has been logged since 2015, including 2,320 ha in 2019.	Chain Reaction Research	<p>Nisshin OilliO did not source directly from Tabung Haji Plantations. The sourcing of PO from via trading companies and PKO from via ISF and trading companies.</p> <p>Nisshin OilliO has been engaging with our direct suppliers regarding TH Plantations Berhad (THP). Based on the investigation result, THP does not own any shares in Deru Semangat Sdn Bhd (DSSB). However, their holding company, Lembaga Tabung Haji (LTH) owns 55% of DSSB.</p> <p>THP is in the process of finalising the termination of their Management Agreement with DSSB which is targeted to be completed by the end of July 2020. THP has also agreed to put in place NDPE commitments. Meanwhile, THP has ceased all oil palm development in DSSB.</p> <p>Based on supplier's internal LUCA assessment of the DSSB concession area, there has been no land clearing in 2020.</p> <p>Engagement with THP concerning their re-entry criteria has been triggered since July 2020, and our indirect supplier(Wilmar) will continue to guide THP in meeting the criteria.</p>	MONITORING
2	June	2020	Pipit Mutiara Indah, a subsidiary of QL Resources Bhd via ISF and trading companies	Indirect	Satellite imagery shows that between January 3, 2019, and October 20, 2019, a total of 50 hectares were prepared for clearing in the PT Pipit Mutiara Indah concession.	Mighty Earth Rapid Respond Report 28	<p>Nisshin OilliO did not source directly from Pipit Mutiara Indah (PMI), a subsidiary of QL Resources. The sourcing was from via ISF and Trading company.</p> <p>Based on our supplier's response, they initiated engagement with PMI since April 2019 to seek clarification on deforestation alert detected through their Supplier Group Compliance Verification programme. Based on the supporting document submitted by the supplier, it was clarified that the deforestation happened outside their concession boundary. PMI did not carry out any land clearing inside their concession for oil palm development. The first meeting with PMI was conducted in May 2019, where Wilmar has reiterated the NDPE policy compliance. PMI provided written confirmation to the commitment of the NDPE policy and shared their concession map for our ongoing monitoring.</p> <p>They continue to monitor the case and their internal monitoring report in October 2019 has detected land clearing at PT PMI. During their investigation and engagement with PMI, it was clarified that the area has already been felled several years ago and now being cleared for planting. However, as there was no HCS/HCV assessment conducted, they considered this as a non-compliant to the NDPE policy. PMI has committed to an immediate moratorium and they continue to guide PMI in NDPE policy compliance.</p> <p>In April 2020, QL Group has met all the criteria stipulated in the re-entry criteria, including their commitment to the Development of Recovery Plan for Non-Compliant Land Clearing to NDPE policy at the group level incurred from January 2016 onwards.</p> <p>Based on a detailed review of documentation, reports, and letter of commitment from QL Group, the Wilmar Suspension Committee have given due consideration of this progress and have lifted the suspension on QL Group in April 2020.</p> <p>Another indirect supplier Mewah reported that they had communicated with QL Group, and they had an incorrect interpretation of the definition to HCS area and unintentionally developed a areforested area. After receiving an indication from the NGO, they confirmed to rebuilt a system to carry out development based on a correct HCS/HCV assessment. Therefore Mewah has continued the transaction. QL Group has also released the NDPE policy to deepen its commitment to sustainable development.</p>	MONITORING

Nisshin OilliO has initiated engagement with our direct suppliers regarding this case, and had the response that saying they do not source from PT Khatulistiwa Agro Abadi / First Borneo Group and; First Borneo Plantations / First Borneo Group.	Closed	
19	October	2023	Ocho Sur P. SAC (Tibecocho farm)/ Ochosur U SAC (Zanja Seca farm)/ Servicios Agrarios de Pucallpa SAC (Extraction Mill)	Indirect	The violation of the human rights of members of the Native Community of a region of Peru	The Office of the United Nations High Commissioner for Human Rights (OHCHR)	The Nisshin OilliO Group, Ltd. ("NOG" including its entire group companies) investigated its business relationship with Ocho Sur P. SAC in Peru ("Ocho Sur" including its group companies). As a result, we found that Ocho Sur may have been involved in the upstream supply chain of our group company ("Subsidiary") in the past. Since a Tier 1 supplier to Subsidiary ("Supplier") had provided NOG with a mill list that included Ocho Sur, Subsidiary contacted Supplier which had business with Ocho Sur before. NOG required Supplier through Subsidiary to disclose information on Supplier's monitoring and the investigation of Ocho Sur. According to Supplier, there have been no issues of human rights violations of concern in Supplier's business except for the case of Ocho Sur. Also, Supplier has not procured palm-derived raw materials any more from Ocho Sur since 2023. We highly evaluate the action and the current situation of Supplier. In addition, NOG was reported that Supplier has established and disseminated procurement guidelines and had a human rights due diligence process in place to identify and correct any human rights issues that may pose adverse impacts. Given the possibility of ongoing civil and criminal claims in Peru and other jurisdictions against Ocho Sur, NOG will continue to monitor its developments through public information and other means. Lastly, NOG's Basic Procurement Policy, The Nisshin OilliO Group Supplier Guideline, and Human Rights Policy are in line with relevant international standards, and NOG will continue to work with its supply chain members to ensure that its procurement activities comply with these norms.	MONITORING	Update
20	March	2024	First Resources	Indirect	Based on the information the case for Rapid Response report 44, companies related to First Resources,together they have cleared over 89,000 ha of rainforest in Indonesia since 2008. Nisshin OilliO's latest mill list includes First Resource related mills as suppliers.	Mighty Earth	Nisshin OilliO did not source directly from First Resources. We have engaged with our two direct suppliers which offered mill lists including First Resources. One of them has requested its suppliers to stop procurement from First Resources related mills starting January 2024. The other is in the process of not including products from First Resources beginning in September 2024. We will continue to monitor the progress regarding these suppliers' response.	MONITORING	Update
